

2000 GARRETT METAL DETECTORS

Working Hard to Help You Find More Treasure

PRODUCT CATALOG

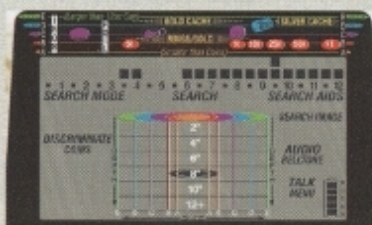

Charles Garrett

"When I found my first treasure cache in 1946, little did I know that I had embarked on an adventure that would bring me and fellow treasure hunters years of pleasure and reward. From that moment on, I have explored every facet of treasure hunting and prospecting, and have enjoyed sharing my knowledge with others."

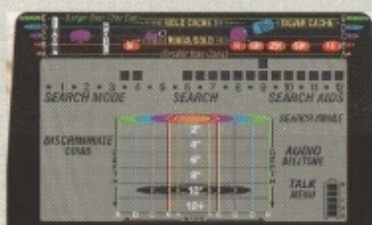

GARRETT

On this page read how the discrimination capabilities of Garrett's patented GTI, GTA and Treasure Ace technologies can help you find treasure other detectors miss.

HOW GRAPHIC TARGET IMAGING FINDS MORE TREASURE AND LESS TRASH:

"B" image indicates a quarter at 8 inches deep.

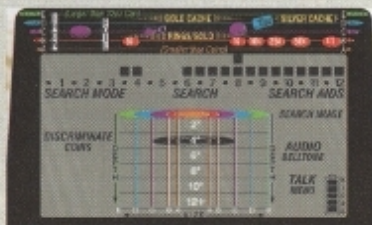

"D" image indicates an aluminum 12 oz. drink can at 10 inches deep.

The GTI 2500's TreasureVision screen shows you target information at a glance:

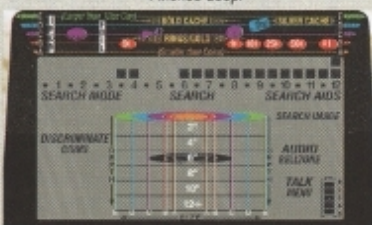

The colorful graphics and vertical number scale that appear in the lower GTI portion of the screen reveal the TRUE size and TRUE depth of a detected target.

Target size falls into five categories: A (Smaller than coins), B (Coin size), C (Larger than coins), D (12 oz. drink can size), and E (Larger than drink can).

Target depth in inches (") appears on the vertical number scale in increments of two.

"C" image indicates an aluminum screwtop at 4 inches deep.

"C" image indicates a pocket watch or small coin cache at 6 inches deep.

SIX GREAT REASONS TO USE A MULTI-NOTCH GTA:

1. **ZERO DISCRIMINATION MODE.** This illustration shows that a pulltab and a quarter have been detected. Two distinct audio "beeps" occur simultaneously with the appearance of cursors identifying the detected targets.

2. **COINS MODE.** A pulltab and quarter have been detected. Although both targets appear on the screen, an audio "beep" occurs only for the quarter.

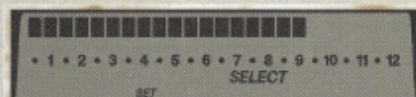

3. **TARGET REJECT.** If your search area is littered with trash like bottlecaps, set the detector to reject them so you detect only the targets you're looking for.

4. **TARGET ACCEPT.** To find, say, a lost earring, clear bottom row of accept cursors. Pass the earring's mate under the searchcoil and press the ACCEPT touchpad. The detector is now set to detect the lost earring or any similarly conductive target. Easy, isn't it?

5. **PINPOINTING.** When the cursors in the top and bottom rows (denoting target strength and depth respectively) meet, the target has been pinpointed.

6. **ADJUST FEATURES.** The top row of cursors doubles as an adjustment gauge when setting Threshold, Depth Sensitivity, Surface Elimination and Tone. In this example, the +/- touchpad has been used to adjust the Depth Sensitivity to 75% of the detector's available power.

FIND COINS IN FOUR EASY STEPS WITH TREASURE ACE:

STEP 1: Accept/reject a target. The five cursors in the top row comprise objects that have been included in detection ("Accept" targets). The unit portion to the left of the cursors indicates the objects that have been excluded from detection ("Reject").

STEP 2: Locate an accepted target. When the searchcoil encounters, say, a coin at two inches deep, an audible audio signal occurs simultaneously with the appearance of cursors on the extreme right and left sides of the lower row.

STEP 3: Identify the target. When the coil reaches the target, the top cursor indicates a coin. The audio increases and the bottom cursors begin moving towards the center.

STEP 4: Pinpoint the target. When the center of the coil is directly over the coin, a loud "peak" signal occurs and the bottom cursors join together in the center, confirming that the target has been pinpointed.

EXCLUSIVE TECHNOLOGY

1

Onboard DSP Chip

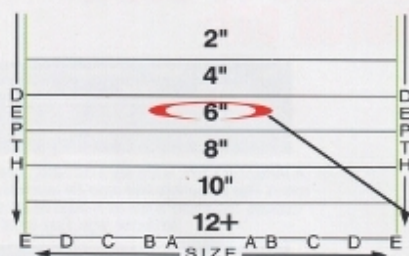

Garrett is the only hobby metal detector manufacturer that boasts the power of a dedicated onboard Digital Signal Processor (**DSP**) chip. Far more sophisticated than off-the-shelf microprocessors, this special computerized chip allows engineers to "customize" the detector to perform complex functions that ultimately make the detector search deeper, faster and identify targets more accurately.

2

Graphic Target Imaging (GTI)

Garrett's GTI revolutionized metal detecting even further by becoming the first detector to display a detected target's **true size**. The unique, easy-to-understand GTI display reveals a detected target's true size via colorful, easy-to-understand graphics.

5

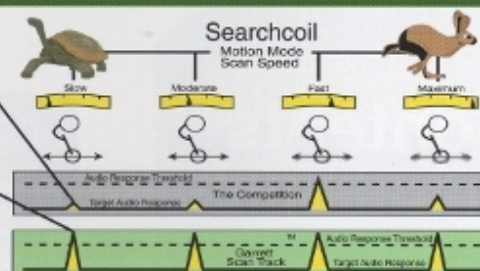

True Size and Depth

With some detectors it's impossible to know whether a detected target is junk or treasure until you dig it up. Because different targets share similar conductivities, detecting, for example, what you think is a quarter may well be an aluminum can. The GTI 2500 and 1500's **TRUE** size and depth technology enables you to determine whether a detected target is junk or treasure before you dig it up.

Peaks indicate detection signals of competitive models

Peaks indicate detection signals with Scan Track™

6

Scan Track™

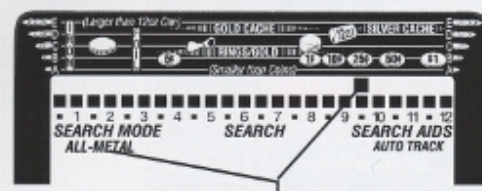

Today's discrimination detectors (also known as motion detectors) force you to scan in a very narrow speed range to prevent targets from being missed.

Only Garrett's exclusive Scan Track technology lets you scan virtually as fast or as slow as you want without missing valuable targets thanks to sophisticated circuitry that ensures the detector performs optimally no matter what your hunting style.

9

Target I.D. in All-Metal Mode

Imagine being able to identify a target while hunting in All-Metal Mode — think of all the digging time you'd save! That's what Garrett had in mind when it developed its All-Metal, non-motion Target ID technology. The illustration at right shows that a quarter has been detected in All-Metal mode.

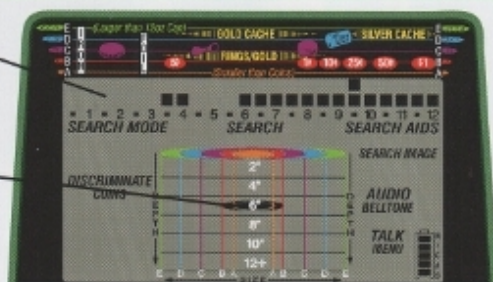

Screen indicates a quarter has been found in the All Metal mode.

FROM GARRETT

In pinpoint mode, the flashing cursor and number scale IDs the target as a quarter at six inches

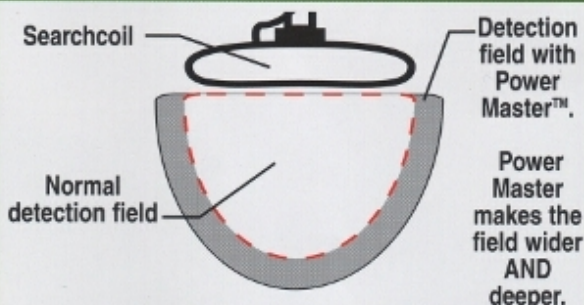

Graph indicates a B-sized target (i.e., coin size) at six inches

3

TreasureVision™

Garrett's newest innovation combines its GTA and GTI graphic displays into one unique, colorful screen called TreasureVision. In addition to showing a detected target's probable identity and true size, TreasureVision goes a step further and also reveals the target's **true depth**. With this much target information at your fingertips, you can find more treasure than you've ever imagined.

7

Power Master™

Garrett's exclusive **Power Master™** circuitry boosts detection depth up to 20 percent and increases the searchcoil's scanning width. **Power Master™** gives a detector the extra information it needs to better identify targets and discriminate more accurately.

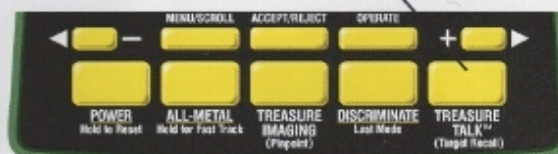

4

Graphic Target Analyzer (GTA)

Garrett's GTA revolutionized metal detecting by becoming the first mid-range detector whose LCD revealed a target's **probable identity**—graphically. The unique, easy-to-read GTA display instantly reveals a target's probable identity and continually shows the names of the operating mode, search aid and discrimination method in use.

Treasure Talk™ can be used continuously or on demand

8

Treasure Talk™

Garrett's exclusive voice function makes your hunt easier by verbally announcing various setting adjustments and target information. Use the Treasure Talk touchpad to listen to the announcements continuously or on demand.

10

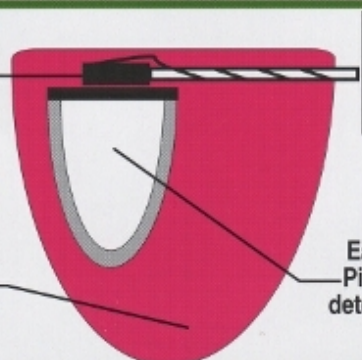

Depth Multiplier with EagleEye™ Pinpointing

The **Treasure Hound™ Depth Multiplier with EagleEye™ Pinpointing** (on command) multiplies the detection depth of large objects by two to three times, plus it ignores small, unwanted objects. This exclusive Garrett accessory prevents needless digging time and lessens the likelihood of target damage.

Depth Multiplier with EagleEye™ Pinpointing (see page 19)

CHARLES GARRETT ON TREASURE HUNTING

Today, Garrett is the world's value leader when it comes to advanced metal detection. Our impressive array of versatile, high-quality metal detectors means that there is a Garrett metal detector for everyone. Whether you are a beginner, an experienced hunter or a professional, our entire product line, including our budget models, is guaranteed to provide the highest quality of performance.

During the past 36 years, Garrett Electronics has earned a solid reputation as the world's leading manufacturer of advanced, high-tech metal detectors for treasure

hunting, law enforcement and security. Our sophisticated, top-of-the-line Graphic Target Imaging (GTI) detectors are the culmination of a 20-year effort to perfect the use of microprocessors in metal detectors.

When I discovered my first treasure cache in 1946 at age 14, little did I know that I embarked on an adventure that would bring me and fellow treasure hunters years of pleasure and reward. From that moment on, I have explored every facet of treasure hunting and prospecting. In 1964, I designed and built my very first metal detector,

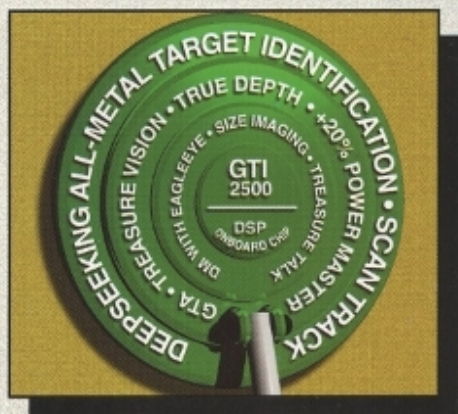

one that I still enjoy using today.

A strong passion for treasure hunting and my experience as an aerospace engineer in the 1960s provided a solid foundation from which years of metal detection innovations at Garrett Electronics have resulted.

As I approach my seventh decade, I am still very much on the move, surveying old treasure sites and field testing each new Garrett detector for myself—and finding lots of treasure in the process. From one fellow treasure hunter to another, I encourage you to select the right equipment, do your research and be persistent in your efforts. You too, can be a successful treasure hunter.

See you out in the field.

Charles Garrett

WELCOME

GARRETT GTI 2500

THE ULTIMATE TECHNOLOGICAL MASTERPIECE

United States

"The Garrett GTI 2500 proves how much detectors have evolved.

The GTI 2500 offers great performance, doing all the work for you without you having to be computer savvy. Graphic Target Imaging has made all the difference."

Ben Myers, photo journalist and field tester

GTI 2500: A Technological Masterpiece

Garrett's top-of-the-line GTI 2500 incorporates more than a quarter century's worth of innovative metal detection technology.

Backed by a powerful onboard DSP chip, the GTI 2500's unique benefits can't be beat. From the graphic identification of targets to unsurpassed depth capabilities and hunting versatility, the GTI 2500 does it ALL.

"Seeing" is Believing

Only Garrett enables you to "see" the real size and depth of a detected target. Garrett's exclusive GTA (Graphic target Analyzer) and GTI (Graphic Target Imaging) technologies team up to bring you **TreasureVision**, a patented breakthrough system that shows you a target's identity and size via unique, user-friendly color graphics. TreasureVision virtually takes the guesswork out of treasure hunting. See whether the target is a coin, pull-tab, bottlecap,

drink can or large cache-sized object before you start digging. And view all of the information on one convenient easy-to-read screen!

Locate Treasure at Greater Depths

Search for treasure at depths greater than you've imagined thanks to a **9.5-inch Imaging searchcoil** and exclusive **Power Master circuitry** which boosts detection depth by a whopping 20 percent. Add the **Treasure Hound Depth Multiplier** with **EagleEye Pinpointing** and the GTI 2500 can find treasure at depths no other detector can reach.

Hunt YOUR Way

Even experienced hunters can miss treasure by scanning too fast or slow. GTI 2500's special **Scan Track** feature solves this problem by automatically adapting to any changes in your hunting style. What's more, the detector also adapts to changes in ground conditions automatically, helping to make your hunt prosperous, and hassle-free.

Exclusive Garrett Features

- E** **Garrett Imaging™ with TreasureVision™** - provides true depth/size grid with GTA conductivity and notch discrimination.
- E** **True All-Metal Deepseeking mode** - provides superior detection depth and visual target ID.
- E** **Power Master™ circuitry with onboard DSP** - provides the most accurate discrimination, 20% greater depth, and superior target ID. Much more accurate than analog systems.
- E** **Treasure Talk™** - provides verbal confirmation of target information.
- E** **ScanTrack™ adapts to hunting style & ground composition** - provides continuous optimization of detector for max depth.
- E** **Treasure Hound with EagleEye™ Depth Multiplier (optional)** - provides pinpointing and detection of treasure caches 2-3 times deeper.

Spanish instructions available

"Professional treasure hunters need professional tools. Garrett has the best detectors available."

GTI 2500

Treasure Max Technology™

The unique TreasureVision screen confirms the target's identity by graphically revealing its TRUE size and TRUE depth—in this case a D-sized target (i.e., a 12-ounce aluminum drink can) at eight inches. This patented target feedback system truly is in a class by itself. Once you experience TreasureVision, you'll never hunt with anything else.

Allows you to scroll through the following search modes, aids or settings and turn them on or off in conjunction with the +/- touchpads:

Modes:

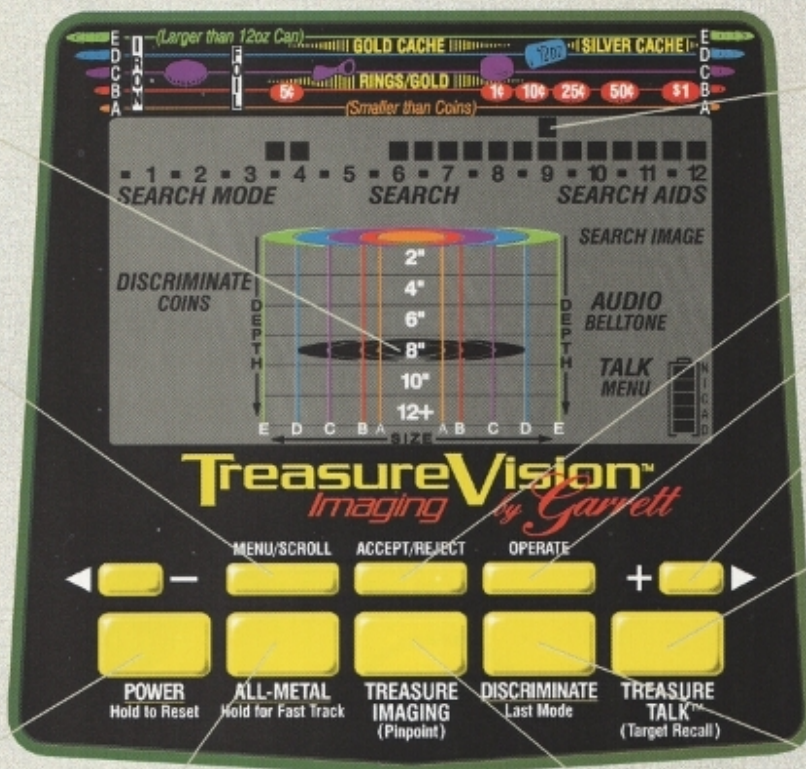

Discriminate (Coins, Jewelry, Relics, Zero, Custom) All-Metal Search Aids:

Surface/Salt elimination; and Belltone/B-level audio (Discriminate mode only); Auto Track and Manual Ground Balance (All-Metal mode only); and Talk and Search Image (both Discriminate & All-Metal modes).

Settings (both Discriminate & All-Metal modes):

Sensitivity (detection depth), Threshold (audio level), Frequency, Volume, Tone, Rechargeable or regular battery monitoring.

Turns the detector on/off and reverts back to factory settings when held for five seconds.

Activates the All-Metal mode or Fast Track ground balancing.

Activates automatic pinpointing while in either search mode. Used in conjunction with the TreasureVision screen to accurately identify a target.

Here, the target has already been pinpointed and the flashing cursor and number scale IDs it as a dime or a can at eight inches. While other detector's target information stops here, the GTI 2500 goes further.

Includes or excludes the targets of your choice from detection (Discriminate mode only).

Reverts to operate mode from menu/scroll.

Used in conjunction with the MENU/SCROLL touchpad to turn search aids on (+) or off (-) and adjust levels of search aid settings.

Verbally announces detected target's ID, size and depth.

Activates previous Discriminate mode.

PROFESSIONAL

GARRETT GTI 1500

Canada

"Imaging is the backbone of my new GTI 1500. Getting accurate information on target ID, size, pinpointing and depth has saved me tons of digging time. I use my GTI for beach, land and ghost town searches, and for coin, jewelry and relic hunting. One lady was ecstatic when I found the 14kt. gold ring she lost. But, I think I was happier!"

Don Cyr, Canadian treasure hunter

GTI 1500 Makes Finding Trash Obsolete

Designed with the serious coinshooter in mind, the **GTI 1500** boasts all of the key benefits of the 2500 but at a smaller cost. Like the GTI 2500, it too is backed by powerful **PowerMaster DSP™** circuitry and a 9.5-

inch Imaging searchcoil to help locate hard to reach coins. The **GTI 1500** also gives you instant feedback on the kind of coin you've detected and how deep it is by revealing its true size and true depth graphically, again via Garrett's unique **GTI** display.

Don't dig for

aluminum cans when what you're really after are coins and rings. Rely on the TreasureVision screen to tell you if the detected target is the size of a coin and what its denomination is. TreasureVision provides extra target information to help you decide whether a target is worth digging, enabling you to spend more time digging treasure instead of trash.

Only Garrett packs this much superior quality into one affordable metal detector. If you're not already a serious coinshooter, one afternoon with a **GTI 1500** and a treasure pouch bursting with coins will make you one!

"It's almost too easy for me to find coins with my Garrett. I take it with me everywhere!"

GTI 1500

Colorful icons instantly reveal the probable identity of a detected target — in this case it is a "B" sized target (i.e., coin sized).

The flashing cursor and number scale IDs a target as a quarter.

Allows you to scroll through the following search modes, aides or settings and turn them on or off in conjunction with the +/- touchpads:

Modes:

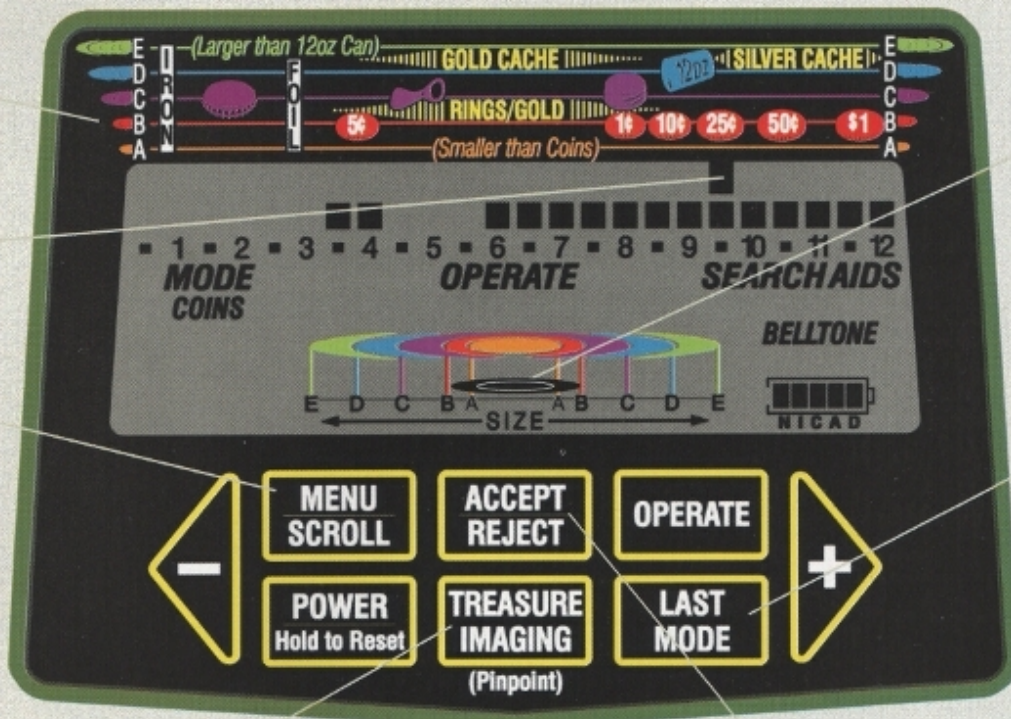

Coins, Jewelry, Relics, Zero, Custom.

Search Aids:

Self elimination, Belltone and Backlight.

Settings:

Sensitivity (depth), Threshold (audio), Frequency, Volume, Tone and NiCad (battery).

Graphics confirm the target is indeed a quarter by revealing its TRUE size — in this case a "B" sized target (i.e., coin sized). (Note: Had the graphics revealed a "D" sized target, you would have known it was a can and avoided it).

Activates previous mode.

Activates automatic pinpointing. Used in conjunction with the TreasureVision screen to accurately identify a target.

Includes or excludes the targets of your choice from detection.

AFFORDABLE CUTTING-EDGE SIMPLICITY

The introduction of GTA technology almost a decade ago caused a sensation among treasure hunting enthusiasts everywhere. The patented, microprocessor-driven **Graphic Target Analyzer (GTA)** was the first mid-range hobby detector to reveal a target's probable identity and continuously display the names of the operating mode, search aid and discrimination method in use.

After years of refinements and added features, the GTAx series remains in a class by itself. The detectors' unique mix

of high performance, easy operation and affordability make them mainstays among veteran and beginners alike.

All four GTAx models boast the revolutionary **Graphic Target Analyzer LCD**, which reveals coin depth in pinpoint mode (except GTAx 400), displays an easy-to-read, horizontal conductivity scale, shows which targets are "notched" (accepted or rejected) for discrimination and in an instant, pinpoints targets automatically.

The **GTAx 1250**, is the series' newest star player comprising key features of GTI technology. A boost from

Garrett's exclusive **Power Master™** circuitry with **Onboard DSP™** enables the GTAx 1250 to search for treasure at depths 20% percent greater than usual, making it the series' deepest seeking detector.

Sophisticated **Power Master** circuitry also drives the **GTAx 750**, enhancing depth, discrimination and target ID, making this detector's performance unsurpassed among similar mid-range models. The **GTAx 550** is known for being an advanced performance-level detector boasting dual-mode operation. Beginners love the high performance they get from the GTAx 550's factory preset **COINS** mode and veterans swear by the detector's strong discrimination and deepseeking capabilities. The **GTAx 400** rounds out the series, offering new hobbyists the benefit of GTA sophistication with the simplicity of "One-Touch" operation.

In terms of price and performance, nothing beats a GTAx. With so much information on display and available at your fingertips, it's no wonder that a Garrett GTAx is considered one of the best investments a treasure hunter can make.

EXPERIENCED

GARRETT TREASURE ACE FAMILY

American West

"Garrett helped me to choose the perfect detector for my needs and has been a great help ever since. I love treasure hunting with my new Treasure Ace 300. I can't seem to stop finding coins and other valuable items. My wife wants her own Garrett detector so she can be as successful as I am!"

A satisfied treasure hunter

8 1/2 - inch
Crossfire II™
searchcoil

The **Treasure Ace** line of detectors utilizes the same microprocessor technology found in more expensive instruments. All Ace detectors feature full-range discrimination which permits searching for all-metal objects or ignoring trash to seek specific treasures. Concentrating on coins, jewelry and other treasures, saves precious time and makes the hunt more profitable.

Clear signals on the LCD display provide instant visual target identity. Microprocessor controls ensure years of

THE LOW-COST VALUE LEADERS

reliable, deep, accurate searching. Treasure Ace detectors are lightweight (under three pounds) and extremely easy to use.

Don't settle for a "toy" detector if you're looking for a bargain. Get *good value* instead. Treasure Ace detectors are manufactured in the same Garrett factory alongside its world-famous GTI and GTAx models.

Treasure Ace 300: Visual Target ID

The **Treasure Ace 300** has the exclusive TreasureEye™ feature, but takes it a step further

with Visual Target ID. Its LCD panel has twin scales with discrimination segments. The upper scale indicates the precise discrimination you have set and the targets that will be audibly announced. Using the lower scale, TreasureEye™ pinpointing will precisely locate targets. A depth control regulates sensitivity so you can achieve maximum depth under all search conditions.

Treasure Ace 200: With TreasureEye™ Pinpointing.

The **Treasure Ace 200** also has the incredible TreasureEye™ pinpointing feature to help you precisely locate targets. This saves valuable digging time and helps prevent coin damage.

Treasure Ace 100: The Low-Cost High Performer

Don't be fooled by the low cost of the **Treasure Ace 100**. It has all the microprocessor capabilities that have made Garrett detectors famous. Just turn it on, and you're ready to find treasure! It's truly a superb performer.

GARRETT CX FAMILY

North America

"I have virtually made a living throughout North America with Master Hunter deepseeking detectors. My friends and I are proof of how successful a treasure hunter can be when searching for caches and gold with a Garrett detector."

Roy Lagal, Lifelong professional treasure hunter/pro prospector

See Roy's patented Gold Pans, page 20.

UNIVERSAL-USE DETECTORS IN THE MASTER HUNTER STYLE

Twenty years ago, Charles Garrett's wanted to develop a computerized metal detector that would locate all kinds of treasure and achieve extraordinary depth and efficiency under the toughest operating and ground conditions.

Countless hours of successful field use and a string of awesome discoveries led to the creation of Garrett's renowned CX detector. Over the years, the CX series of detectors has established a strong niche

for itself in the areas of treasure caches, battlefield relics, gold nuggets, gold placer, veins and coin hunting.

The latest innovation to the CX family is the **Master Hunter CX Plus** which builds upon the technology of the Master Hunter CX, incorporating a more rugged LCD that reveals a detected target's identity and conductivity while in either search mode.

The one-touch **Grand Master Hunter CXIII®**,

with its **Power Master™** depth-boosting circuitry and **Graphic Target Analyzer (GTA)** discrimination remains a favorite among beginner and experienced treasure hunter alike. For hunters with a penchant for deeply buried treasures, both the CX Plus and the CXIII can be equipped with Garrett's exclusive **Treasure Hound Depth Multiplier** which can help you reach caches and large treasure that many other detectors can't reach.

SPECIALTY

Western Australia

"It's amazing how much gold can still be found in many of the western U.S. gold producing states and even as far south as Australia. For a while I wasn't very successful. But ever since I started using the Scorpion Gold Stinger with true All-Metal mode, I have found more than my share of gold and a lot of other valuable treasures."

RJ, Arizona, professional gold prospector

GARRETT

- Analog operating system
- Manually adjustable ground balance & tuning
- Three operating modes
- Famous Groundhog 15kHz circuitry

"Wherever there is detectable gold to be found, you can find it with the Scorpion Gold Stinger."

Charles Garrett

SCORPION GOLD STINGER

The **Scorpion Gold Stinger** offers a three-mode versatility unmatched by any other gold-hunting detector. And its Groundhog (15kHz) circuit is world famous for its power to penetrate ground minerals. The Groundhog punches through heavily mineralized soil to locate nuggets, placer, float and ore veins.

The Stinger's 3x7-inch elliptical searchcoil can detect the tiniest gold nuggets and flakes. You can use the 5x10-inch elliptical coil to locate nuggets, veins, float and wet and dry placer at extreme depths. It also lets you sample ore and check "hot rocks" with ease and dependability.

A flip of a switch is all it takes to change from Non-Motion All-Metal operation to Motion Discriminate and search for coins. Flip the switch again for true TR discrimination in order to accurately identify conductive ore. With the Scorpion Gold Stinger you won't be fooled by iron rocks, fools gold, non-conductive specimens or low-grade silver ore.

You'll love the **Gold Stinger's** remarkable maneuverability over complex ground conditions and in narrow cracks and fissures when nugget and placer searching.

5"x10" 2D elliptical Gold Stinger Crossfire searchcoil and 10" gold pan model:1194370

- 3-piece stem design with diving attachments

SEA HUNTER MARK II TREASURE DIVER

FIND GOLD AND PLATINUM RINGS OTHER PIS MISS!

The above graph shows the typical detection responses from metals in both Trash Elimination modes. At a discrimination setting of eight, all metals above NICKELS in **Standard (Std)** mode, and above PULLTABS in **Discrete (Dis)** mode, are detected. This example illustrates how the enhanced discrimination power of Discrete mode ensures that you can eliminate pulltabs with little or no rejection of most rings. Another remarkable innovation from Garrett.

Model: 1151970

**EXCLUSIVE!
DISCRETE MODE
PERFORMANCE**

Discrimination control of the
NEW Sea Hunter Mark II

If you want a submersible PI detector that really discriminates, look no further than the **Sea Hunter Mark II**.

In addition to providing standard discrimination, the Sea Hunter Mark II boasts a unique **Discrete Elimination** mode which enables it to discriminate unlike any other PI manufactured. Gone are those pesky pulltab signals when you're trying to find rings. The Sea Hunter ignores a lot of trash that plagues conventional PI detectors and can find treasure at depths other submersibles can't reach.

A longtime favorite of renowned professional treasure hunters like Mel Fisher and Bob Marx, the **Sea Hunter** has earned a reputation for also helping beach and surf-loving coinshooters to find thousands of dollars worth of lost coins and jewelry.

Comfortable For Beach and Water Hunts

Like its predecessor, the new **Sea Hunter Mark II** is fast becoming one of the most sought after submersible detectors in the world by both treasure hunters and search and recovery teams. The **Mark II** ignores salt water and most minerals and includes four convenient stem arrangements to suit your needs: the long stem with top, hip and under cuff stem mounts and the short stem **ScubaMate** for underwater searches.

SPECIALTY

GARRETT

"Using the right accessory can spell the difference between success and failure."

Charles Garrett

Padded two-zipper carry bag: Specially designed with extra-thick padding to carry any fully assembled Garrett detector. #1608500

Rainproof environmental covers: For CX, #1600400. For GTA, #1600300. For GTAx or GTI 1500, #1600371. For GTI 2000 or GTI 2500 #1618200

CX-series supreme bag: Specially designed to carry the CX series of detectors. Soft leather-like material with two zippered pockets. #1617300

Garrett Master Sound stereo headphones: Mask noise, boost signals, and find more treasure. Individual volume controls on each earpiece. #1603000

All-purpose detector carry bag: Designed to carry any Garrett detector. Zippered pockets for extra storage and reinforced nylon straps. #1608700

Pocket Probe: Search walls, chimneys, flooring and "dug holes" for lost coins, jewelry and money caches. Keep it with you or in your vehicle. #1177000

Deluxe all-purpose convenience bag: Perfect for carrying your detector accessories or for travel. Six pockets, carrying handles, and handy shoulder strap. #1611500

Optional arm rest for all Master Hunter CX models: Improves balance and control when 12 1/2" searchcoil is used. #1601800

How to select the right searchcoil to meet your needs.

Accessorize Your Way to Success

Having the right accessories is one of the keys to successful treasure hunting. Garrett offers a variety of useful items to enhance your treasure hunting experience.

Headphones are essential for masking outside noise so that faint signals (which indicate deeper targets) are heard more easily. Garrett headphones are very comfortable and have separate volume controls for each earpiece.

Our **coin digging kit** contains the tools needed to pinpoint and recover a target. The kit includes a probe and a non-detectable Composite Digger for fast target recovery and comes with a leather-like pouch with a zippered pocket to safely hold all of your treasure finds.

Optional **searchcoils** of varying sizes, expand your hunting capabilities by enabling you to hunt deeper, cover large areas, or locate hard-to-detect treasure among trash and in confined spaces.

All of Garrett's high quality accessories are designed to make your treasure hunting experience easier and more productive.

Coil Selection Guide:

Small:	4- to 5-inch, 3 x 7-inch
General Purpose:	8- to 10-inch, 5 x 10-inch
Deepseeking:	12-inch
Treasure Hound™:	Multiplies detection depth
Prospecting:	5 x 10-inch

ACCESSORIES

GARRETT GOLD PAN KITS

The NEW... Two-Hand
Supersluice 15" gold pan

Also Traps one-ounce
or larger nuggets!

DELUXE Gold Pan Kit

#1651400

Combination Sifter/Classifier, designed not only for quickly discarding large rocks when gold panning, but can also be used for sifting coins, jewelry and relics in wet or dry materials. It fits into a 5-gallon bucket and its $\frac{3}{8}$ -inch exit holes can trap treasure dime size and larger.

The Gold Guzzler bottle sucks fine gold granules from the water at the bottom of a pan.

The **Complete Gold Pan Kit** contains the 10-inch and 14-inch gold pans, Classifier, Gold Guzzler, Tweezers, and two gold vials as well as the informative, easy-to-read book, *Find an Ounce of Gold a Day*, by Charles Garrett. #1651300

Double your gold recovery with Garrett's exclusive Gravity Trap™ pan.

The **Gravity Trap™ Pan** is the world's only patented gold pan with a riffled design that ensures rapid gold recovery in wet or dry conditions. Garrett also offers the **Supersluice**, the first gold pan to securely trap one-ounce nuggets or larger. It has deep $\frac{1}{2}$ -inch riffles for rapid recovery of wet or dry material. The 15-inch Supersluice's large pan bottom works more material, saving you valuable

prospecting time.

Also offered are the standard 14-inch Prospector Gold Pan and the compact 10-inch Backpacker Gold Pan.

All Garrett gold pans are lightweight and virtually indestructible. Their patented 90-degree riffles can help you find gold faster and more efficiently.

But it doesn't end there. There are more Garrett gold recovery products to suit your prospecting needs.

The Garrett 14-inch

S = Set to initial points (>). Then, discrimination search mode operation is automatic.

DSP = Digital Signal Processor for advanced target analysis.

P or E = Patented or exclusive Garrett feature

T = 10-turn analog adjustment pot

F = Factory preset threshold-level audio

SA = Sharp audio-signal pinpointing

LCD = Liquid Crystal Display

PI = Pulse induction

PP = Pinpointing with EagleEye™

C = LCD target cursor

4pc. = Four-piece stem assembly

Spc = Submersible headphones included

Ste = Stereo headphone jack, all others (X) mono

A few cautions:

- Never trespass or hunt on private property without permission.
- National and State parks/monuments, etc. are absolutely "off limits".
- Avoid areas where pipelines or electric lines may be buried.
- Deepseeking detectors can detect concealed pipes, wiring, and other potentially dangerous material. When these are located, the proper authorities should be notified.

Up to 95% accuracy on target ID, size and depth. Operator errors, small target conductivity/size ratio, mineralization and nearby targets may affect accuracy of readings.

Proof of Garrett's excellence is the recognition given them by the following United States patents: 4,705,212; 4,488,115; 4,700,139; 4,599,704; 4,423,377; 4,353,870; 4,334,191; 3,662,255; 4,162,563; 4,334,192; 5,148,151; 5,133,622; 5,721,489; 5,736,696; 5,565,323; Design 274,704 and 259,221; Design 333,990; G.B. Design 2,011,852; Australia Design 111,674 and other patents pending.

LEARN ABOUT THE ART OF TREASURE HUNTING

"How To" Books on Prospecting and Treasure Hunting

Treasure Hunting for Fun and Profit

Charles Garrett recounts numerous incidents in which coins, jewelry, money caches, gold nuggets, and countless other items of value have been found and tells how easy it is to still find them today with a modern metal detector. 204 pages. Garrett. 1506300

New World Shipwrecks 1492-1825

Historical details about more than 4,000 wrecks with specific instructions on recovering treasure from them. 434 pages, 48 with color illustrations. Marx. 1505800

Gold of the Americas

A history of gold and how the precious metal helped shape the history of the Americas; filled with colorful vignettes and stories of bravery and greed. 168 pages, 26 with color illustrations. J. Marx. 1500300

Find Gold with a Metal Detector

Complete information on using detectors to find gold nuggets, veins and ore; illustrated panning instructions. 140 pages, 20 with color illustrations. Garrett/Lagal. 1545500

Real Gold in Those Golden Years

Prescription for a happier, more satisfying life for seniors practicing the hobby of metal detecting. 140 pages, 20 with color illustrations. Garrett. 1500400

The New Successful Coin Hunting

The world's most authoritative guide to finding valuable coins, includes information on computerized detectors. 259 pages, 34 with color illustrations. Garrett. 1501500

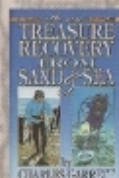

Ghost Town Treasures

The lore of ghost town with illustrations explaining how to locate them and find the hidden treasure they contain. 156 pages, 20 with color illustrations. (See companion video, *Utah Treasure Vision*, below) 1508200

Sunken Treasure: How to Find It

Famed underwater salvor Bob Marx shares a lifetime's experience in locating and recovering treasure from beneath the sea. 402 pages, 48 with color illustrations. Marx. 1507500

Treasure Recovery from Sand & Sea

Precise instructions for locating the "blanket of wealth" hidden beneath the sand, surf and sea. 466 pages, 50 with color illustrations. Garrett. 1505700

Buried Treasures You Can Find

State-by-state listing of thousands of sites where treasure is believed to exist; guide for using modern detectors. 365 pages, 48 with color illustrations. Marx. 1500000

Find An Ounce of Gold a Day

Pocket guide (included with Gold Pan Kit) gives basic instructions on using Gravity Trap pans to recover gold. 48 pages. Legal. 1543800

Gold Panning is Easy

New field guide shows the beginner exactly how to find and pan gold and how to locate it with a metal detector. 134 pages, 20 with color illustrations. Legal. 1505470

The New Modern Metal Detectors

Revised handbook explaining the proper use of metal detectors, including computerized models. Ideal for for field use or home study. 446 pages, 50 with color illustrations. Garrett. 1501700

An Introduction to Metal Detectors

Pocket-guide carefully explains in layman's terms how metal detectors operate and how to find treasure with them. 80 pages. Garrett. 1545100

Security Planning Manuals

Produced by Garrett's Security Division. *Effective Security Screening, Effective Ground Searching, Special Events Including Olympics Security.*
