AF103

Industrial Metal Detector

BATTERY

To connect the battery, pull out battery compartment from top of instrument case. Insert 9v battery in compartment (battery can only be inserted one way) and replace. Your detector is now ready to operate.

The battery is the life blood of your instrument. When not in use, please ensure that the battery is disconnected and kept in a cool place.

A PP3 rechargeable battery could be used if preferred

HOW TO USE YOUR DETECTOR

Follow these steps to tune your detector:

1. While standing, raise the loop away from any surrounding metal, and hold it as steady as you can.
2. Now, turn the control clockwise until you hear a loud tone coming from the speaker. Re-adjust this control counter-clockwise until the tone almost disappears completely. You are now ready to search.

SEARCHING WITH YOUR DETECTOR

The tone coming from the speaker of your detector will tell you where metal objects are located. When you hear a sharp bleep, or an increase in the volume of the tone, the coil is over an object.

To locate hidden or buried objects with a properly tuned detector, systematically sweep the coil from side to side across the area you are working. For maximum performance when searching you should always try to keep the loop at a constant level and as close to the object scanned as possible, following the tuning instructions given above.

WARRANTY

If within 12 months (1 year) from the original date of purchase your White's Metal Detector fails through normal use or due to defects in either material or workmanship, White's Electronics (UK) Ltd will repair or replace, at its option, all necessary parts without charge for parts or labour.

Simply return the detector to our factory in Inverness, Scotland, giving details of the fault.

Item excluded from this warranty are non-rechargeable batteries, headphones and other accessories.

The warranty is not valid unless the Warranty Registration Card is Returned or submitted online at <http://whites.co.uk/warranty.html> within 10 days of original purchase for the purpose of recording the date, which is the actual commencement date of this warranty.

Duration of any implied warranties (merchantability and fitness for a particular purpose) shall not be longer than the stated warranty.

Neither the manufacturer nor the retailer shall be liable for any incidental or consequential damages, resulting from defects or failures of the instrument to perform.

The warranty does not affect your statutory rights.
