

White's Electronics (UK) LTD

Operator Manual

AF350

Industrial Metal Detector

BATTERY

To check battery status, switch on and pull in the trigger, this will indicate on the meter the battery status. This instrument requires 8 x AA batteries.

THRESHOLD

To adjust the Threshold, adjust the tuner control until a suitable level of sound is achieved.

GROUND BALANCE

This instrument has automatic ground balance. Lower the coil to the ground and then wait for the Threshold to stabilize.

SENSITIVITY

This instrument has three levels of sensitivity, High, Medium and Low. The use of these is determined by the ground conditions and the size of the target being sought.

PLEASE NOTE

If you are changing from one sensitivity setting to another, you need to re-ground balance the instrument.

WARRANTY

If within 24 months (2 years) from the original date of purchase your White's Metal Detector fails through normal use or due to defects in either material or workmanship, White's Electronics (UK) Ltd will repair or replace, at its option, all necessary parts without charge for parts or labour.

Simply return the detector to our factory in Inverness, Scotland, giving details of the fault.

Item excluded from this warranty are non-rechargeable batteries, headphones and other accessories.

The warranty is not valid unless the Warranty Registration Card is Returned or submitted online at <http://whites.co.uk/warranty.html> within 10 days of original purchase for the purpose of recording the date, which is the actual commencement date of this warranty.

Duration of any implied warranties (merchantability and fitness for a particular purpose) shall not be longer than the stated warranty.

Neither the manufacturer nor the retailer shall be liable for any incidental or consequential damages, resulting from defects or failures of the instrument to perform.

The warranty does not affect your statutory rights.
